Convention Overview

.... Garry Jackson

In my dual role as Convenor of the Convention Sub-committee, and as your CMOC president, I guess I was in a pretty interesting position along the long and winding journey for the 2020 Convention!

I won't go back over the ups and down of our planning, because those stories have been covered in prior issues of Burble, and in other club communications. Accordingly the notes below represent some overview thoughts and observations, fine tuned by the opportunity to step back and reflect (and relax!) over the last four weeks since the farewell breakfast.

Without doubt, my primary reflection is the overwhelming effort and contribution made by the members of the Convention sub committee, individually and collectively. My notebook shows that we met as a group no less than 28 times (!), the first meeting being May 22 2018, and the last meeting was our "wash-up" session on November 3. There is no doubt that this core group (see inset) deserves the highest compliments and thanks from all of us for stepping up and making it happen. Literally.

One of the major learnings arising from the flow on effects that the covid 19 situation had on our planning was the imperative need to manage the financial risk to our club. Whilst we were all primarily focussed on tracking the covid levels (and the green light that L1 represented), the underlying issue that emerged was that even L1 represented substantial financial risk if not managed carefully. Fortunately the immediate acceptance of a shared risk model by the vast majority of our registered participants allowed us to proceed and manage the potential downside of CMOC being caught heavily out of pocket should NZ have reverted to L2 in the 12 days immediately prior to the Convention commencement.

Talking of financials, I don't think it's inappropriate to highlight that the 2020 Convention returned a small surplus for CMOC, after all income and expenditure was finalised. Whilst a national convention should never be seen or planned as a revenue gatherer, the modest surplus achieved is certainly on the right side of the ledger, and better than the alternative!

An interesting question that emerged as the dust settled after the Convention was whether we are seeing the waning of public interest in car shows? Whilst there are many logical reasons why the public attendance at the Grand Mustang Show at Horncastle was slightly lower than expected, I can't help but wonder if the increasing number of great classic car events that we are now seeing are taking the shine (apologies for the pun) off such shows? Maybe something to think about for the budgeting for future Conventions.

But concluding this overview on the positives, I think there are five success factors that we should recognise:

- The extensive financial planning we did (the budget was updated at least 6 times), all with a substantial contingency provision to help protect us against the unexpected
- The fantastic support (and early commitment) from Ford and local Ford dealers Team Hutchinson Ford and Avon City Ford)
- The great team of gold sponsors (and The Sound as our marketing partner) who also committed their support early and stuck with us throughout the "roller coaster" journey.
- The great national support we received from the other six Clubs (attendance from beyond Canty was 59%, compared with 48% in 2014)
- The weather couldn't have been better!

But the final word must be a repeat of my opening words sincere and grateful thanks to all those who made it all happen, and to make it the success that it was! See you all in 2027!!

Special thanks to our great Convention team:

Mike and Peggy Dilger

Loretta Jackson

Neville and Lesley Hyland

Rob Donaldson

John and Christine Quinn

Rick Paulsen and Brent Williams (layout planning)

..... and all the CMOC volunteers and helpers who stepped up and assisted throughout the event!

Saturday's Grand Mustang Show

... Bob Verall

The Mustang Car Show roller coaster!

Who would have thought of the challenges ahead when we kicked off the subcommittee planning in earnest in March 2019?

Our original planning was based on Te Pae for the Convention as a whole, with its wow factor of being a new venue and having all convention activity on one site.

The construction drawings initially were not fully complete and evoked quite a few queries on what would be the final design. We needed to finalise the layout for the car show, and understand the entry points to the exhibition hall and foyers. We also decided that a substantial portion of the Mustangs would be located outside along Oxford Boulevard.

All this activity had to be done prior to registration so that we knew how many cars and attendees we could accommodate for the Convention, and to finalise a realistic overall budget. As we developed these plans we could see that we could cater for around 200 cars.

Pre-registration opened in late 2019 and indications by January 2020 were tracking towards 150, so we were confident that the original number would be achievable when full registration opened.

Along with this, we were working on traffic management, H&S, classes for judging, public liability insurance requirements, and special display feature cars. Plus we were starting to identify all the little things that need to be done

In February we all started to read about the covid19 that was appearing in other countries, and our nervousness grew during March, culminating in the level 4 lockdown on March 25. This period had a major effect on the build completion of Te Pae and they announced that there was a delay to the opening; due to the lock down & re-establishing the site. A bit deflating but somewhat offset by Te Pae management immediately swinging to action to secure alternative VBase venues for CMOC within a week.

The car show would now be at Christchurch Arena (Horncastle), used previously in 2008. With help from Rick Paulsen who had done the 2008 layout drawings, we developed a new round of layout drawings and logistics for the new venue. This gave us the capability of 138 cars in the main arena and 15 in the concourse (we didn't use this area in 2008), and we made a decision to display the not-for-judging cars in a fenced area with access from the Arena.

One luxury that we did not have was access on the Friday for loading Mustangs into the Arena; this had to be done on the Saturday morning from 5am, 1.2km of marking tape had to be laid before any car could enter. All cars were into the Arena and access doors closed at 9-15am, a great effort by all

The car photos were seen as a possible bottle neck, the loading bay was not going to be suitable so the decision was to take them outside. A novel way of identifying each car was by entrant number using a flip mini scoreboard to be in the corner of each photo, thanks to our photographer Lucas for a great solution

All the logos designed with Te Pae in mind continued and were used for the entrant numbers and car certificates. (pto)

(..... continued)

The judging was an area that is always contentious with each Club tending to have their own criteria, so an effort was made to mix the judges from different clubs, with the judging objective being presentation & cleanliness. Judging started at 10am and was substantially completed by 2pm, a great effort; thanks Steve.

We were fortunate in having several “promotional” vehicles; having 10 iconic Shelby’s throughout the years & models, 4 Bullitt Mustangs along with accompanying memorabilia, 3 convertibles to work with Variety charity to put “smiles on kids faces” and 4 great new model Mustangs supplied by our sponsors THF & ACF Ford.

At 4pm the show closed, 1.2kM of tape was taken up & binned, and all the cars exited by 5pm, again thanks team for the assistance.

Car certificates got their photos attached & distributed at the Sunday car run & Monday breakfast, the class & trophy winners’ information was sent to Vic at A to Z Engraving. All the photos were downloaded ready to be used for the Sunday night awards presentations

Throughout the 19 months the committee remained positive, and the support of the clubs nationally gave us the desire to see the event happen, zoom meetings, lots of emails and phone calls were the order of the day from March until October 2020.

Would I do it again??? Saturday was a long day; up at 3-45am and left the Arena at 5-30pm, well done team, it could not have happened without club members helping

A legacy is the initiative taken by Bluebridge who came on board and offered 3 things, special rates, a fare refunded and a travel voucher raffle or auction. The continuation from here is a yearly concession deal for all Mustang club members to travel with any vehicle at these special rates so the deal is there for next year’s convention in BOP.

Cheers, Bob Verrall

Saturday's Partners' Program

.... Peggy Dilger

The great Mustang hunt!

While the main convention committee were grappling with the huge issues of hosting anything at all during covid, our sub committee were tasked with entertaining our visitors during the Grand Mustang Show. When it was decided the convention was going ahead, we had one month to make decisions and organise all the details. A HUGE pat on the back and "well done!" to Jude Hanson, Jo Pascoe, Andrea Bannan, Diane Thomson, and Julie Fraser. The group's collective skills, ideas, contributions and can-do attitude pulled off a wonderfully successful day.

So, with the help of facebook messenger, we agreed on a plan - to showcase the rebuild of our exciting new city and enable our visitors to discover for themselves, just how far we have come.

Julie and I met with the marketing manager of the Tram company who was a wonderfully energetic ideas person and we tossed around our plans together. Then we spent the rest of the day walking the Tram route approaching businesses with a "local flavour" and ownership to participate in our partners program. We settled on nine companies who agreed to host a model mustang and to provide samples of their products. They were as excited as we were.

We needed to know exact numbers for the Tram and bus, so sent out an email to all participants of the convention. As a group, we had complete confidence in our format, and as our numbers grew and grew and grew, we quickly hired another bus. Our total on the day was 91!

The day of The Grand Mustang Show dawned warm and calm. A perfect day for The Great Mustang Hunt. As the general public started queuing to get in, the hunters gathered outside Christchurch Arena in anticipation. We issued them with their instructions printed on canary yellow cardboard. There would be no sliding under the radar on this trip! Some very happy hunters won goodies from the participating businesses and we shared our local knowledge of destinations along the Tram route not to be missed. The last item on the Mustang Hunt was to - Make a new friend and take a photo of them. This started on the bus into the Tram station and didn't stop all day!

The scene was set. Off we went into town for our hop on hop off exploration of Christchurch City. The Tram Company had returned their biggest tram back into service for us and their other Trams all had welcome signs at the doors. Our committee wore pink sashes and were highly visible and available around the city for anything required by our fellow mustang hunters. At leisure and in glorious sunshine, we spent the next four hours, exploring, hunting out the Mustangs, shopping up a storm, sampling our wonderful local cuisine and meeting other mustang enthusiasts, all wanting to take photos of their new friends! A bonus was the Big Band Festival on in town over Labour weekend, so we had dancing in the streets added to our itinerary. Totally planned!

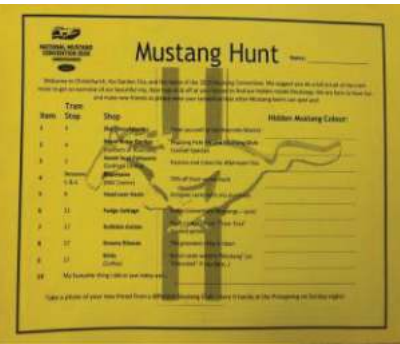

My highlight of the day was the enthusiasm and joy displayed by everyone participating, including the business owners who jumped on board. We had Fudge Cottage who made us fudge mustangs. Repertoire NZ who filled their racks for us with 70% off, Rollicking Gelato who had a Tram Trax special gelato and the best was Kaiser Brew Garden who rebranded their pale ale for us. Their bar manager produced a marvellous cocktail, the Mustang Mule. Yummmmm. A huge hit on such a warm day. To the delight of our visitors The Wizard of New Zealand even hopped on board our Trams and chatted away as only he can.

At the end of the day we had to choose the 3 winners of magnificent gift baskets full of local products. Ultimately, this came down to answers of item 10 on the Mustang Hunt. "My favourite thing I did or saw today was....." Some very heart-warming observations indeed.

The committee had been sending photos throughout the day to my daughter Shannon, who had agreed to put a slide show together. And, at Sunday's Gala Dinner, to the Pink song, "Today is the Day", our 3 winners were presented with their prizes. Their new friends were invited to choose an item from them. The bottles of Moet were the obvious choice.

Perhaps it was the covid effect, or maybe Christchurch really is rocking the rebuild. Our committee, participants and our city absolutely came to the party. Thanks New Zealand for getting us to covid level one.

What a fabulous effort by Peggy, Julie and the "ladies in pink"! And it all came together in less than three weeks! Imagine what they could have achieved with a year or more who needs a Mustang car show?!

Sunday Pony Run

..... Jeff Clare

Mid September (unexpected call from Garry Jackson)

“Hello Garry, how are you?”

“Good thanks Jeff. The reason for the call is to see if you help us out with taking over organizing the Sunday Pony run for The Mustang Nationals in 7 weeks time? Don’t worry there has been plenty of work done on it already. And you did such a good job managing the Sunday Pony Run back for the 2014 Convention”

“Ok Gary, no probs”

“That’s great, see you at the committee meeting on Tuesday night.”

Committee Meeting

“Here’s all the paperwork to date, might pay to confirm bookings.”

Venue: Amberley Domain, confirmed? – Check – already done

Start: Papanui Club - Check – already done

Lunch: Joe’s Garage– Check – confirmed menu – no problems

Rally Route: Not so happy, worried about roadworks at Tram Rd and needs to be shorter to get entrants back into town for Sunday night action. No problems – a reasonably simple run out to Amberley with plenty of left turns and some nice North Canterbury scenery for our out of town guests. We had good comments so have to assume it was a success.

Lunch: A little slow getting the lunch bags to the hungry throng but the wait was definitely worth it. Thank you to the team getting the food out as soon as it was assembled.

Inter club challenge: This took a bit of thinking. We were time poor and originally I thought a radio control stock car would be fun for the entrants to master. I was a bit worried that it might take someone off at the knees as they are really heavy. Rick came to the rescue with an R/C Mustang drift car. Lots of laughs and Southern coming out on top.

The support I got from our Club members on the day was awesome thanks! What a stunning bunch of people that are Mustang owners. I dreaded the cleanup.

One lovely lady from Southern took charge and filled rubbish bags with the lunch remnants. Once everyone had left, the grounds were spotless. Thank you so much.

What would I do different?

I don’t know. Probably have the venue closer to town. This could allow a longer rally and more time for socializing.

It really is fun being involved in events such as the Nationals. Don’t be afraid to put your hand up. The support from Garry and everyone makes things just happen!

Sunday's Gala Awards Evening Loretta Jackson

Everyone loves a party and a chance to dress up, and Mustang owners are certainly no different! Over the years many of us have been fortunate to attend a number of Mustang Conventions, and I think it's fair to say that the memories of the Sunday night functions have often stayed with us long after the Saturday car shows.

Our planning for Sunday night 2020 was originally shaped by the superb banquet facilities of the Te Pae design drawings and construction plans upstairs by way of a striking staircase right out of the movies, more space than we could ever have dreamed of, picturesque outlook overlooking the Avon and Victoria square, state of the art lighting and audio visual effects, and the Te Pae staff even came up with the idea of a red carpet which they would have in stock, just for us! All this promised something very different and memorable, and we were all excited and energised.

Then came covid 19, L4 lockdowns, Te Pae delays, uncertainty and stress, and the need for a "Plan B".

The good Te Pae people stepped in and secured for us the choice of one of the two V Base venues at Wigram. After much thought we decided to use the Therese Angelo Hall, partly due to the larger size and capability, and also the fact that we had used the Aircraft Museum facility in 2014.

The Convention sub committee left all the planning to me and my wonderful helper Gaye Plumridge. We set our sights on still trying to match the impact and style that Te Pae might have been, but adjusted for the style and layout of the Wigram Hall. With so much space, we quickly settled on the idea of having two Mustangs in the venue as an integral part of the theming and visual impact. The other early decision we made was our colour selections, and we went for a combination of blue, white and silver.

We knew that three critical elements would determine the all-round success of the evening the choice and performance of the band, the quality of the lighting and audiovisual we could achieve (all the equipment needed to be brought in), and could we meet the budget in these tough times? From the feedback we received, we think we might have made it!

There were two other big challenges; what would be the overall theme that would both suit the venue and excite the participants to give it a go, and secondly how do we ensure that we run the evening on time (to maximise our dancing time!).

For the theme we chose "the letter M" because it was simple and gave everyone lots of possibilities (and it soon became the décor for the entrance into the Hall). We were blown away by how everyone really got into it, with so many superb costumes.

Running to time was probably my biggest challenge, because I know that everyone a show that doesn't "drag on", and also because I knew how good the band was going to be! I think we made it thanks to our MC Rob Cope-Williams' professional approach, and the amount of time and planning we put into the awards presentations.

On reflection, five concluding comments and special messages:

- Rob Henderson from Narrative campaigns did a superb job putting the slick and stylish AV presentation together under great pressure
- Our band Retrosonic really rocked! Pass the word on to anyone looking for a band for a special event.
- VBase deserve special mention for the highest levels of service and food quality that they gave us on Sunday night (and also at the Limes Room at the Town Hall on Saturday night).
- To the Convention subcommittee, thanks for the support and freedom to "put the show together", and for the help to pack in and load out on the day and following morning.
- Special thanks and appreciation to Gaye for wll her input and support Awesome.

We all hope you enjoyed the party!

PS: and with some lateral thinking and bulk buying, we did the whole decor and theming well within the small budget that we had tasked ourselves with!

Convention 2020

..... Misc notes and pics

Did you know Mustang Conventions rotate across the seven Mustang Owner Clubs, on an agreed sequence. No one ever remembers a convention being cancelled or postponed, or the schedule being interrupted. This tradition was very much part of our reticence to even think about not hosting “our” convention in 2020.

Did you know A notable feature was the number of attendees for whom 2020 was their first ever Convention. This was apparent across all the 7 clubs, and a great signal for the future and the strength of the Mustang spirit.

Did you know CMOC pioneered the “Spirit of Mustang” awards at the 2014 Convention, and Waikato followed in 2019. We continued the format this year, with independent external judges. They has to choose the 10 only Mustangs they believed best represented the true and iconic Mustang legend across the years and models, including presentation .

Did you know Bay of Plenty will host their very first National Convention in 2021. Up until 2010, the rostered schedule was 5 clubs, with Southern being added in 2011. Shortly after Bay of Plenty was added to the schedule, from 2021. They’ve been working on their plans since 2015! (You can see why postponing the Canterbury convention in 2020 was never really an option!)

Did you know? We chose Variety NZ as the Convention’s charity of choice for two reasons, partly because of they are national children’s charity, and partly because they are Ford NZ’s charity of choice. Ford has been involved with Variety since their NZ founding in the early 1990’s, and today are one of Variety’s corporate ambassadors.

Did you know? To the Editor’s albeit limited knowledge, there were at least 4 Mustangs at the 2020 Convention that were also present back in the Convention hosted by CMOC in 1988!.... Dennis Phillips’ ‘67 Shelby, Ashley Smith’s 64 Convertible, Martin van Elst’s ‘70 GT500KR, & Colin Read’s ‘71 Mach 1.

Did you know? Not only was the number of first time participants a feature of the 2020 Convention, 3 CMOC members who all joined only three months prior scooped class trophy prizes! Congratulations to Mark Newman and Marina Taylor, Roger and Julie Kett, and Ross Trotter. Well done!

Did you know? The new Te Pae Convention Centre was very much central in our early planning, and it was on schedule right up to the covid 19 L4 lockdown. Our relationship with Te Pae management was such that they negotiated the replacement VBase venues for us, at Te Pae prices, plus their senior management followed through with us, including a best wishes call on the evening ahead of the Convention itself. Watch this space for possible future opportunities for CMOC with Te Pae!
